Citing References in Text
References may be indicated in one of three ways:

By superscript numbers:
Oscillation in the reaction of benzaldehyde with oxygen was reported previously.¹

By italic numbers on the line and in parentheses:
The mineralization of TCE by a pure culture of a methane-oxidizing organism has been reported (2).

By author name and year of publication in parentheses:
The primary structure of this enzyme has also been determined (Finnegan et al., 1996).

Literature Cited - Examples
References should be collected in a numerical list (for numbered citations) or an alphabetical list (for author-date citations) titled Literature Cited at the end of the paper. Do not include items that were not cited in the paper.
Use full journal titles or abbreviated journal titles from the Chemical Abstracts Service source index (CASSI).
Journal article titles, book chapter titles and thesis or dissertation titles are not necessary, but are desirable. Single-space all entries and between entries.

PRINT SOURCES

Journal Articles

References to Chemical Abstracts

Non-scientific Magazines & Newspapers

Book with Editors – including Handbooks and Encyclopedias
Books without editors

Theses or Dissertations

Patents

Technical Reports and Bulletins
ACS does not specifically cover MSDS, but they can be considered technical reports
